

#NFSD2026

SAFE MAINTENANCE AREA **CHECKLIST**

- Report to site supervisor before starting work
- Carry out maintenance away from main traffic and pedestrian routes
- Use barriers/cones/signage to create a safe exclusion zone
- Ensure area is level, stable, and well lit
- Park truck safely with forks lowered and parking brake applied
- Remove key/isolate equipment before maintenance begins
- Clearly identify equipment as out of service
- Keep tools, cables, and parts clear of walkways
- Prevent unauthorised personnel entering work area
- Inform site supervisor before returning equipment to service
